Question	Response
Is the current one-way traffic system at	1.0000000
Stourbridge an improvement on the previous system?	Yes 7 No 6
2. Do you favour a return to the previous traffic	
management system?	No 6 Yes 7
3. What are the main problems that you are experiencing with the current system?	 No problems – the new system is far better than the old system Drives to chapel need upgrading Entrance turn is quite sharp Not being able to park near chapel
	 Parking on verges Driving away from families going towards the funeral Entrance lacks prominence Burial service and corteges are in conflict on approach roads None – I just prefer old system
4. How would you suggest these problems be overcome?	 Open discussion at next meeting The system is fine – do not be pressured into changing Ensure burials in cemetery do not clash with services coming into the crematorium Improve the new entrance Wider road areas to allow clear access Clear road markings for car park Staff parking moved away from the main drive. Revert back to the old system, directing traffic to exit via current entrance.
5. What were the main problems of the old traffic management system?	 Blocking of the main drive causing congestion Two way traffic caused blockages Hearse + 3 limo's problems turning under the canopy Everyone using the main entrance Cars and funeral vehicles constantly head to head Cars parking 'on top' of funeral party at entrance Funeral vehicles passing one another as one arrives and one leaves None Few that could not be resolved.
6. Do you favour a continuation with the present traffic management system or a reversion to the previous?	7 – current 5 – Old 1 – Depends on your plans of improvement of current system'
