MICK,

basically the location is on a very busy dual carriageway, the area where he wants to be located is just past a major set of traffic lights. add to this the road and speed... people pulling in/out would cause a serious danger to other road users. there is in fact an easily accessible 24hr bp service station directly opposite the site with suitable refreshment area and extensive safe parking.

there would be no real safe area for customers to stand or use the proposer's facilities.. the layby leads out directly onto the road.. giving possibilities of collisions... it is not a partitioned off layby..

As such we as a department would strongly oppose a facility here.

hope you can word this better !!!!

Cheers tony mc
