Sorry Sarah can I just clarify that you are still objecting to the licence?

Thanks

Kerry

After my telephone conversation today with Kerry Mullings, I have been able to contact the applicant, namely Mr D Jones using his mobile phone number who stated that he intends to have discos and live bands on occasions of not more than five times per year. The bands bring their own equipment including speakers, the volume of which will be managed at the premises. Mr Jones was aware of the previous noise complaint but stated that it was from a fund raising event and was aware of the front doors being open during the entertainment but assures me that it was an isolated incident. Therefore the conditions stated in my previous attached email should be considered by the committee.

It has not been possible to gain access into the premises despite numerous telephone attempts being made by myself. I also believe that the premises operates in the evening after normal working hours. However I would like to make the following representation.

There was a complaint reported in February 2008 alleging noise nuisance from music and behavioural nuisance from customers drinking in the front car park. At the time of the incident the complainant reported that the external doors and windows were open during the entertainment.

Therefore for the above reasons above I would ask the committee to consider the following

conditions:

- During programmed entertainments, ensure the external doors are kept in the closed position except for access and egress.
- During programmed entertainments, ensure the windows are kept in the closed position.
- Notices should be erected on exit doors asking customers to leave quietly.
