

APPENDIX A

ROAD	OBJECTIONS	COUNCIL'S RESPONSE
Bell Street South. Prohibition of right turn.	From Church left turn would take vehicles through town centre, including funeral corteges. Usual cemetery and crematorium in opposite direction.	The new junction layout means that right turning vehicles are almost immediately at the traffic signals and exit vehicles will be approaching from the right. The objection should be overruled.
Church Hill – One Way	From 2 residents – Street operates without problems. It would be a great inconvenience to exit via Seagers Lane and Bell Street onto Moor Street.	This was requested by a resident but in view of objection this should not be proceeded with.
John Street, Bent Street and Victoria Street – One Way	From 4 residents of John Street and 2 non residents. This would put additional traffic on Bank Street and prevent their easy access to Dudley Road.	This was requested by residents. However, as other residents oppose the measure for John Street, it is proposed that the one way length should be shortened to the first 62 metres from Bank Street. Bent Street and Victoria Street to remain as advertised.
