Subject: PEL 4/1(261), The Crestwood, Lapwood Ave, Kford

Sensitivity: Personal

I refer to the recent application for renewal of the above PEL. In accordance with Members request, the premises were visited on 24th January 2005 to check the arrangements regarding the windows and ventilation to the premises. There was no amplified music activity occurring at the time, as the visit was made during normal office hours, by arrangement with the manager.

There are three bay windows to the bar area, which are currently of single glazed, timber framed construction with a secondary glazed unit fitted to the internal bay edge of the windows. The secondary glazed panels can be opened but the single framed windows are sealed shut by paint. I am advised that new sealed double glazed window units are on order to replace the timber framed bays which are rotting and this work is expected to be completed by the end of January/beginning of February 2005. I am also advised that the secondary glazing units will be retained when the new sealed units are fitted, thus providing effectively a triple glazed window to the exterior. The new double glazed sealed units will of course have keys to enable the windows to be opened, but I am advised by the pub manager that the windows will continue to be kept closed. There are two extract fans at either end of the room, which provide mechanical ventilation to the room.

The Karaoke machine was not available for inspection, as it is the property of the visiting compere who brings it with him at weekends. I was thus unable to confirm whether there is any mechanism on the machine that would cut out at 80 dB, nor was I able to confirm the likely noise level at the windows.

I would confirm that complaints of noise regarding this property were last recorded by this department in August 2001.

Kind Regards

~~Gale I would like this to go to committee to consider the matter of the need to keep doors and windows closed.
thankyou~~

If you would like the recommendation to go on the licence then it would have to be considered by the Committee.

We have not had any objections to the application on this occasion.

Thanks

Gale

Gale, An officer visited following the case going to Committee in November because there was a public objection and we wished to check the situation regarding the windows and doors. I presume that you have not had public objections this time which would require the case to go to Committee? I would recommend a condition that doors and windows into the entertainment area remain closed during entertainment. Does this need to go to committee for this condition to be considered or can it be applied by agreement with the applicant, who I understand is willing to close doors and windows? Could you or Janet advise accordingly please? Thankyou

This was the one that the members asked us to visit re double glazed windows and limiting of Karaoke machine. There was a previous objection from a local resident, We've had no complaints. I don't think that we particularly want it considered, but it was the members that asked us to visit, so they may want to know the outcome. Do you want to respond to Gail

Kind Regards

Frances,

I refer to your E Mail dated the 4th February 2005 to Angela Wright regarding the Crestwood, Blenheim Road, Kingswinford in respect of the application for the grant of a public entertainments licence.

Can you let us know asap as to whether or not you would like this matter considered by the Licensing and Safety Committee.

Thanks for your help.
