

Mary Stevens Park

Sir,

Having reviewed the incident logs for Mary Stevens Park 2006/2007 I have compiled the attached comparative charts.

It is clear nearly all of the reported response incidents and crimes involve young persons under the age of 19yrs.

The majority of the incidents involve anti social behaviour with alcohol being the contributory factor.

For the year 2006, 43 command and control incidents were recorded that I consider relevant.

Out of those 43, 23 had specific reference to alcohol.

For the year 2007 (to July), 44 command and control incidents of relevance were recorded.

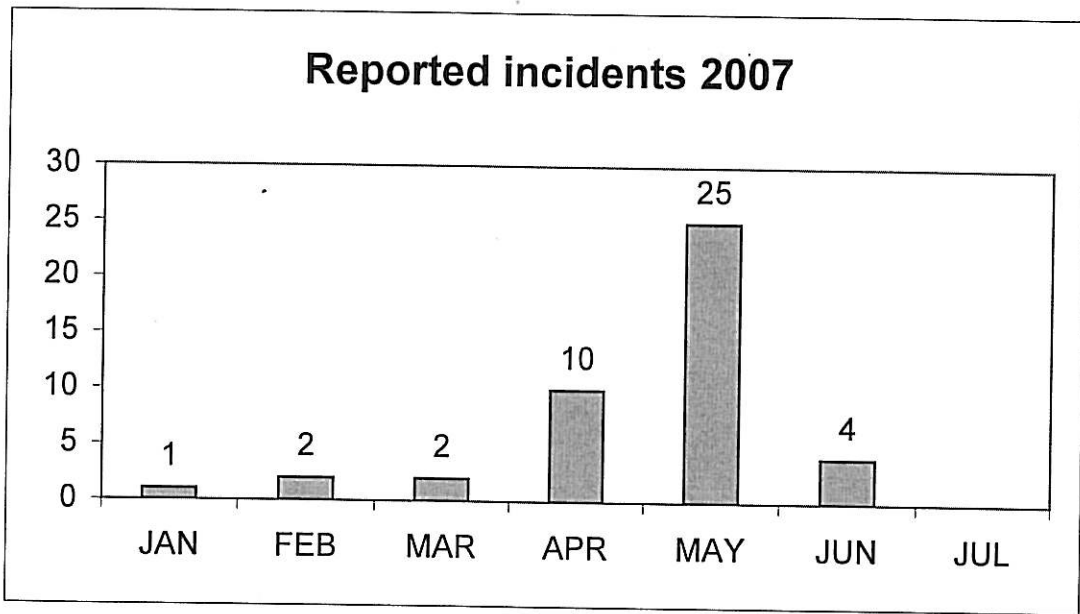

Out of those 44, 25 had specific reference to alcohol

The principal criminal offences recorded involved damage, burglary, robbery and assault.

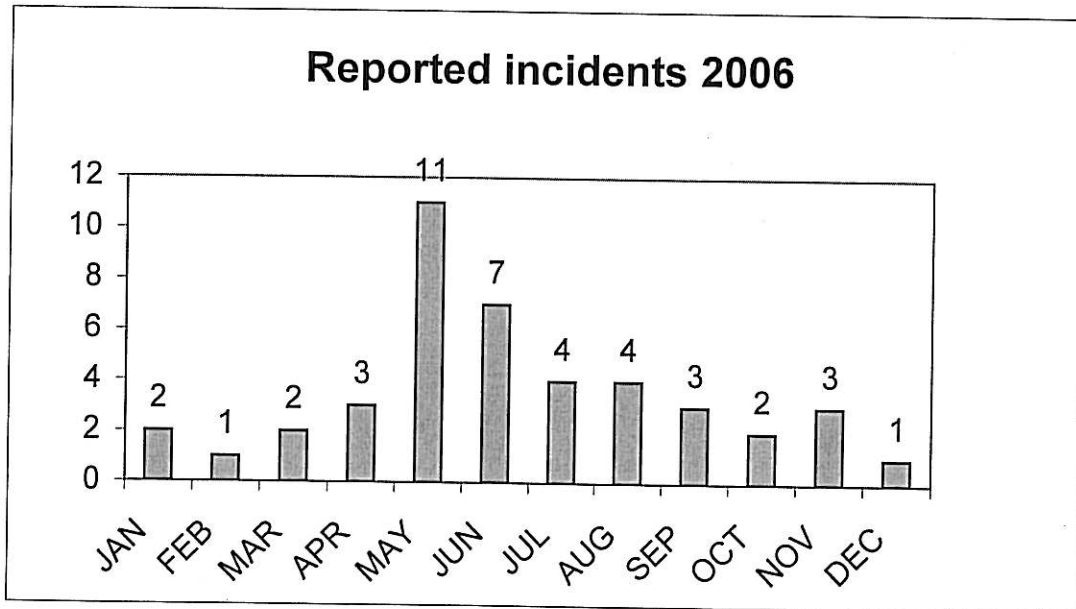

These offences could have been influenced by alcohol but that is hard to determine.

Sgt Jones
